

CALL FOR VOLUNTEERS

Dear fellow Acousticians

We are excited to announce the upcoming launch of the EAA Documenta Acustica Electronica (DAEL), a literature distribution system that will revolutionize the way we access information about acoustics. But before we make this platform available to the public, we need your help!

We are currently seeking volunteers to evaluate the DAEL platform and provide us with valuable feedback before its official launch. We are looking for individuals with diverse backgrounds and expertise, including:

- Two acoustics experts who can evaluate the content of the platform and provide feedback on its usefulness and accuracy.
- One IT expert who can assess the functionality and usability of the platform, and suggest improvements to enhance its performance.
- One practitioner who can provide us with an objective perspective on the overall user experience of the platform.

The DAEL platform will serve as a centralized hub for all literature related to acoustics, providing access to conference and symposium proceedings, books, reports, and theses. This platform is crucial for sharing information that is otherwise confined to European acoustical societies, laboratories, or companies, and it will greatly benefit the EAA members.

Your participation in evaluating the DAEL platform will not only help us improve its quality but will also contribute to the advancement of acoustics research and knowledge-sharing within our community. We believe that this platform has the potential to transform the way we access and share information about acoustics, and your input is vital to ensure its success.

If you are interested in volunteering for this exciting opportunity, please send an email to eea.documenta@euracoustics.org expressing your interest and indicating which expertise category you belong to. We will then provide you with further instructions on how to proceed.

Thank you in advance for your valuable contribution to the EAA Documenta Acustica Electronica (DAEL) platform.

Sincerely,

Chiara Bartalucci, EAA DAEL Product Manager

Dick Botteldooren, EAA President
